## Vin Service Ice Towers

Vin Service Ice towers are beautifully sculpted draft beer towers. A remote glycol power pack system will build up an impressive "ice jacket" up to ½" thick. A minimum relative humidity of 25% and an oversized glycol power pack are required for proper formation of the ice. Bases with a built in drip tray is required to contain run-off. Constructed of highly polished stainless steel and equipped with "*European Style Faucets*", beer and glycol lines.

If you want mouth watering beer appeal, then call Beverage Dispensing Systems today for more information.
